

NOTICE

Govt. of India has initiated simplified procedure for installation of rooftop solar projects and the same is being implemented through National Portal. It has been observed that several vendors have registered in the National Portal using Mobile No. and Mail-IDs pertaining to the vendors/proprietors. These vendors are submitting applications on behalf of the consumers which is not in accordance with the guidelines of the National Portal/simplified procedure.

2. It is being re-iterated that registration and submission of application on the National Portal shall be done by actual consumer only using own details. The application submitted by the vendor on behalf of the consumer will be outrightly rejected. Further, strict action would be taken against the vendors registering and submitting applications on behalf of the consumer and this may include blacklisting from participation in the rooftop solar program.

3. DISCOMs officials shall also reject the applications submitted by the vendors and ensure that only actual consumer is submitting application on the National Portal.
